

IMPACTO® KNEE PROTECTION

Hard Shell Knee Pads

- Co-Polymer foam padding provides excellent knee protection
- Kneepad bends with the knee for comfort and flexibility
- Flat kneeling surface provides stability when working
- Ribbed shell helps prevent slipping
- Helps prevent knee and hip joint stress
- CoolMax® lining wicks away moisture
- Lightweight feel for comfortable all day protection
- Double elastic straps are weaved through the kneepad for easy replacement
- Certified under kneepad international standard EN 14404+A1:2010

ABOUT KNEE PROTECTION Continuous pressure on the knee due to working in a kneeling position may lead to chronic conditions, such as bursitis over the knee cap or injury to the cartilage. Excessive pressure can cause problems such as knee burn pain, fluid build up, tissue swelling, loose joints and associated arthritic conditions. Major knee damage will occur when combining existing trauma with prolonged pressure and irritation along with turning and twisting motions. The use of knee pads is an effective way to reduce the occurrence of knee injuries. Knee pads protect against injuries and inflammation caused by hard surfaces, pieces of gravel and similar objects on ground.

One Size
Sold per pair
30 pairs per case

825-00
with elastic straps
with hook and loop
closure

825-01
with side release plastic
buckle closure for easy
on/off
